

## Working Times

**Our goal is to serve you better.** This schedule allows us the time required to give you the highest quality work. Cases that require a shorter timeframe will be accommodated when possible and may incur a rush surcharge.

**The following times include one day for pick up and delivery.** These are working days; weekends and holidays are not included.

We hope this will assist you in planning and booking appointments for your patients requiring laboratory work. Please do not hesitate to call for case specific scheduling.

Please note that these working times are subject to change during the Holiday season.

Our Holiday schedule is available every November by mail or on our website.
